

Finance Director Services

Working with companies to achieve business and financial growth

The benefits of an experienced Finance Director without the full cost

FDYL are a firm of experienced **Finance Directors** and **Management Accountants**, providing their services to a wide range of companies across the North of England.

Whether your company is small or large, we tailor our service to meet your exact needs.

Our **Finance Directors** enable your company to save money, make running your business easier, grow faster and make it more profitable. Our FDs offer advice, guidance and practical commercial support, whilst working as part of your company's management team.

As an owner or director of a business turning over less than £25 million, do you?

- Suffer from inadequate or late financial information on a regular basis?
- Spend long hours on routine administration because you don't trust others?
- Wish you could have a better relationship with your bank?
- Rarely find time to consider long term or strategic issues?

Strategic Finance:

- Act as a sounding board for the MD to clarify thinking
- Raise additional finance as your business grows
- Help you understand which customers and products earn you the most money
- Assess and reduce financial risk in your business

To assess whether we can add value to your business, allow us to carry out a **free financial diagnostic review**.
